

GAMEBOX

Want to promote your game with your own Gamebox design? Print this Gamebox template, design it with markers (or on your computer before you print it) and share it with friends and family.

Post your game to the Infinity Wall and include the Warp Coordinates on your box.

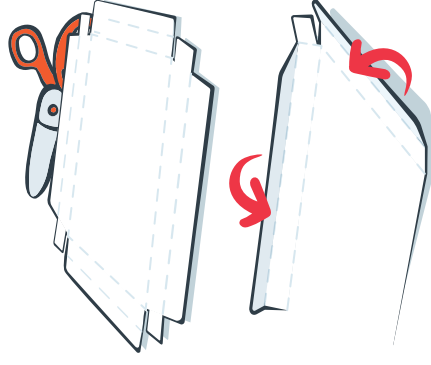

Want to give your Gamebox the finishing touch? Have a parent mail us at support@bloxelsbuilder.com and we'll mail you an **Official Bloxels Seal** for your Gamebox.

If you're creating in the classroom or at a future event, email us at support@bloxelsbuilder.com and we'll send you an event package.

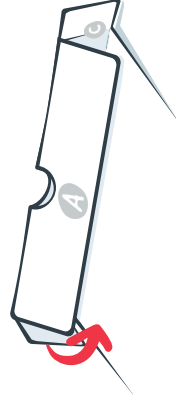

For best results print your box on cardstock paper.

ASSEMBLY INSTRUCTIONS

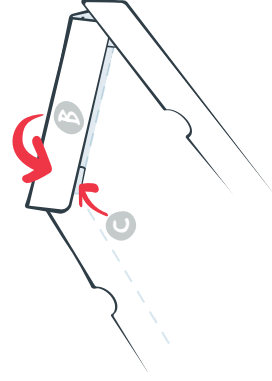

After your box art is done cut out the **top** and **bottom**. For best results pre-fold your Gamebox along all dashed fold-lines before assembling. This will make putting your box together easier. *Ask your parents' permission before using scissors or any sharp cutting utensil.*

Assemble the long sides first (marked **A** on the box). On the box top, cutting the finger-grips is a snap if you fold the long side and cut out the resulting half circle.

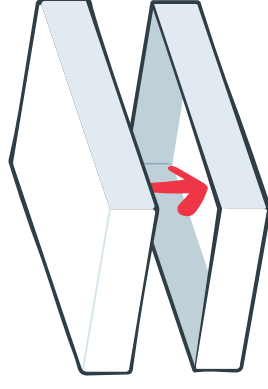

Next, assemble the short sides (marked **B** on the box). Fold the short sides over the tabs attached to the long sides (marked **C**).

Although not completely necessary, for extra stability you can use a small amount of glue or double-sided tape to keep the box edges together.

4

Close the box. **Top** and **bottom** fit together quite snugly once fully assembled. Share with your friends and family!
